

## Incubator Im

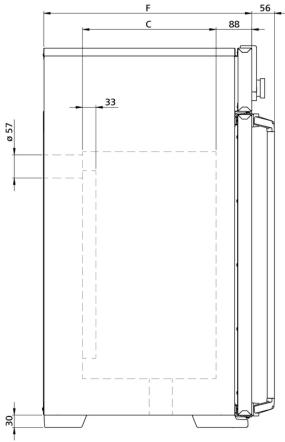

# IF75mplus

The incubator Im is a Class I medical device.

The heating of this incubator is optimally tuned for forced air circulation; the fan can also be switched off completely, and valuable chamber loads for research, pharmaceutics, medicine and food chemistry are warmed up very carefully. On this page, you can find all the essential technical data on our incubator. Our customer relations team will be pleased to help if you want further information. If you should require a customised special solution, please contact our technical specialists at sales@memmert.com.

Setting temperature range  #20 to +80 °C  Morking temperature range  min. 10°C above ambient up to +80°C  Setting accuracy  temperature  1 Prince prature sensor  2 Pt100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error  Control technology  Control COCKPIT  TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFF-colour displays.  Language setting  German, English, Spanish, French, Polish, Czech, Hungarian  Timer  Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function HeatBALANCE  adapting the distribution of the heating performance of the upper and lower heating circuit from -50 % to +50 %  Function SetpointWAIT  the process time does not start until the set temperature is reached  three freely selectable temperature values  adjustable parameters  temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation  fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventiliation  Fan  forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air  Admixture of pre-heated fresh air by electronically adjustable air flap  Vent  Communication  Documentation  programme stored in case of power failure  Programming  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  vent connection disease 2, selectable on display  AutoSAFETY  additionally integrated over- and undertemperature monitor "ASF", automatically following the selective of the selection is selected in selection is selected on display	Temperature	
Setting accuracy temperature  2 P1100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error  Control technology  ControlCOCKPIT  TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.  Language setting  German, English, Spanish, French, Polish, Czech, Hungarian  Timer  Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function HeatBALANCE  adapting the distribution of the heating performance of the upper and lower heating circuit from -50 % to +50 %  Function SetpointWAIT  the process time does not start until the set temperature is reached  three freely selectable temperature values  adjustable parameters  temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation  fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air  Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation  programme stored in case of power failure  Programming  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control  overtemperature monitor TVWV, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on displaye	Setting temperature range	+20 to +80 °C
Temperature sensor 2 P1100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error  Control technology ControlCOCKPIT TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TET-colour displays.  Language setting German, English, Spanish, French, Polish, Czech, Hungarian Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function HeatBALANCE adapting the distribution of the heating performance of the upper and lower heating circuit from -50 % to +50 %  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually he load  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, salectable on display  AutoSAFETY	Working temperature range	min. 10°C above ambient up to +80°C
Control technology ControlCOCKPIT TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.  Language setting German, English, Spanish, French, Polish, Czech, Hungarian  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function HeatBALANCE adapting the distribution of the heating performance of the upper and lower heating circuit from -50 % to +50 %  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY	•	0.1 °C
ControlCOCKPIT TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays. Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function HeatBALANCE adapting the distribution of the heating performance of the upper and lower heating circuit from -50 % to +50 %  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	ControlCOCKPII	·
Function HeatBALANCE adapting the distribution of the heating performance of the upper and lower heating circuit from -50 % to +50 %  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TVWV, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Language setting	German, English, Spanish, French, Polish, Czech, Hungarian
Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days
Calibration three freely selectable temperature values temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Function HeatBALANCE	
adjustable parameters  temperature (Celsius or Fahrenheit), fan speed, air flap position, programme time, time zones, summertime/wintertime  Sterilisation  fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation  Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Function SetpointWAIT	the process time does not start until the set temperature is reached
Sterilisation fixed sterilisation programme (4 hours/160°C) for sterilisation of working chamber, not for sterilising the load  Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Calibration	three freely selectable temperature values
Ventilation Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	adjustable parameters	
Fan forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Sterilisation	
Fresh air  Admixture of pre-heated fresh air by electronically adjustable air flap  Vent  vent connection with restrictor flap  Communication  Documentation  programme stored in case of power failure  Programming  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY  additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Ventilation	
Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Fan	forced air circulation by quite air turbine, adjustable in 10 % steps for each segment individually
Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Fresh air	Admixture of pre-heated fresh air by electronically adjustable air flap
Programming  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY  additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Vent	vent connection with restrictor flap
Programming  AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port  Safety  Temperature control  mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY  additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Communication	
Safety Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Documentation	programme stored in case of power failure
Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Programming	
Temperature control mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	Safety	
approx. 20°C above nominal temperature  Temperature control overtemperature monitor TWW, protection class 3.1 or adjustable temperature limiter TWB, protection class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	-	mechanical temperature limiter TR protection class 1 according to DIN 12880 to switch off the heating
class 2, selectable on display  AutoSAFETY additionally integrated over- and undertemperature monitor "ASF", automatically following the setpoint	. omporatore control	· · · · · · · · · · · · · · · · · · ·
, , , , , , , , , , , , , , , , , , , ,	Temperature control	
in case of overtemperature	AutoSAFETY	value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off
Autodiagnostic system for fault analysis	Autodiagnostic system	for fault analysis
Alarm visual and acoustic	Alarm	visual and acoustic

# Standard equipment

Door	fully insulated stainless steel door with 2-point locking (compression door lock)
Internals	2 stainless steel grid(s), electropolished
Works calibration certificate	incl. works calibration certificate for +37°C
Door	inner glass door

## Stainless steel interior

Dimensions	$w_{(A)} \times h_{(B)} \times d_{(C)}$ : 400 x 560 x 330 mm (d less 39 mm for fan)
Interior	easy-to-clean interior,made of stainless steel, reinforced by deep drawn ribbing with integrated and protected large-area heating on four sides
Volume	74
Max. number of internals	6
Max. loading of chamber	120 kg
Max. loading per internal	20 kg

# Textured stainless steel casing

Dimensions	w <sub>(D)</sub> x h <sub>(E)</sub> x d <sub>(F)</sub> : 585 x 944 x 514 mm (d +56mm door handle)
Housing	rear zinc-plated steel

## **Electrical data**

Voltage	230 V, 50/60 Hz
Electrical load	approx. 1250 W
Voltage	115 V, 50/60 Hz
Electrical load	approx. 900 W

## **Ambient conditions**

Set Up	The distance between the wall and the rear of the appliance must be at least 15 cm. The clearance from the ceiling must not be less than 20 cm and the side clearance from walls or nearby appliances must not be less than 5 cm.
Altitude of installation	max. 2,000 m above sea level
Ambient temperature	+5 °C to +40 °C
Humidity rh	max. 80 %, non-condensing
Overvoltage category	II
Pollution degree	2

# Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 730 x 1130 x 670 mm
Net weight	approx. 66 kg
Gross weight carton	approx. 85 kg

# Standard units are safety-approved and bear the test marks
