

#### Incubator Im

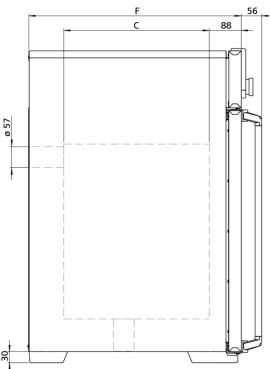

# **IN110**m

The incubator Im is a Class I medical device.

The heating of this incubator is optimally tuned for natural convection and valuable chamber loads for research, pharmaceutics, medicine and food chemistry are warmed up very carefully. On this page, you can find all the essential technical data on our incubator. Our customer relations team will be pleased to help if you want further information. If you should require a customised special solution, please contact our technical specialists at sales@memmert.com.

Temperature Setting temperature range		
Working temperature range at least 5 above ambient temperature to +80 °C  Setting accuracy temperature  Temperature sensor  1 Pt100 sensor DIN class A in 4-wire-circuit  Control technology Language setting  German, English, Spanish, French, Polish, Czech, Hungarian  ControlCOCKPIT  SingleDISPLAY, Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display  Timer  Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT  the process time does not start until the set temperature is reached  Calibration  three freely selectable temperature values  adjustable parameters  temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation  Convection  natural convection  Fresh air  Admixture of pre-heated fresh air by electronically adjustable air flap  Vent  vent connection with restrictor flap  Communication  Documentation  programme stored in case of power failure  Programming  AtmoCONTROL software for reading out, managing and organising the data logger via Ethemet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Temperature	
Setting accuracy temperature  Temperature sensor  1 Pt100 sensor DIN class A in 4-wire-circuit  Control technology  Language setting  German, English, Spanish, French, Polish, Czech, Hungarian  ControlCOCKPIT  SingleDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display  Timer  Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT  the process time does not start until the set temperature is reached  Calibration  three freely selectable temperature values  adjustable parameters  temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation  Convection  natural convection  Fresh air  Admixture of pre-heated fresh air by electronically adjustable air flap  Vent  vent connection with restrictor flap  Communication  Documentation  programme stored in case of power failure  Programming  AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Setting temperature range	+20 to +80 °C
Temperature sensor  1 Pt100 sensor DIN class A in 4-wire-circuit  Control technology Language setting German, English, Spanish, French, Polish, Czech, Hungarian ControlCOCKPIT SingleDISPLAY, Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days Function SetpointWAIT the process time does not start until the set temperature is reached Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation Convection natural convection Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Working temperature range	at least 5 above ambient temperature to +80 °C
Control technology Language setting German, English, Spanish, French, Polish, Czech, Hungarian  ControlCOCKPIT SingleDISPLAY, Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	•	0.1 °C
ControlCOCKPIT SingleDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display  Timer Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication Documentation  programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Temperature sensor	1 Pt100 sensor DIN class A in 4-wire-circuit
ControlCOCKPIT  SingleDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-colour display  Timer  Digital backwards counter with target time setting, adjustable from 1 minute to 99 days  Function SetpointWAIT  the process time does not start until the set temperature is reached  Calibration  three freely selectable temperature values  adjustable parameters  temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation  Convection  natural convection  Admixture of pre-heated fresh air by electronically adjustable air flap  Vent  vent connection with restrictor flap  Communication  Documentation  programme stored in case of power failure  Programming  AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	•	German English Spanish French Polish Czech Hungarian
Function SetpointWAIT the process time does not start until the set temperature is reached  Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature		SingleDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with high-definition
Calibration three freely selectable temperature values  adjustable parameters temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation  Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days
temperature (Celsius or Fahrenheit), air flap position, programme time, time zones, summertime/wintertime  Ventilation Convection natural convection  Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap  Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Function SetpointWAIT	the process time does not start until the set temperature is reached
Ventilation Convection natural convection Fresh air Admixture of pre-heated fresh air by electronically adjustable air flap Vent vent connection with restrictor flap  Communication Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Calibration	three freely selectable temperature values
Convection Presh air Admixture of pre-heated fresh air by electronically adjustable air flap Vent vent connection with restrictor flap  Communication Documentation Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	adjustable parameters	
Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature		natural convection
Communication  Documentation programme stored in case of power failure  Programming AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Fresh air	Admixture of pre-heated fresh air by electronically adjustable air flap
Programming  AtmoCONTROL software for reading out, managing and organising the data logger via Ethernet interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Vent	vent connection with restrictor flap
interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software available as accessory (on demand).  Safety  Temperature control  adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature		programme stored in case of power failure
Temperature control adjustable electronic overtemperature monitor and mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	Programming	interface (temporary trial version can be downloaded). USB stick with AtmoCONTROL software
1 according to DIN 12880 to switch off the heating approx. 20°C above nominal temperature	•	
Autodiagnostic system for fault analysis	Temperature control	
	Autodiagnostic system	for fault analysis

Standard equipment	
Door	fully insulated stainless steel door with 2-point locking (compression door lock)
Internals	2 stainless steel grid(s), electropolished
Works calibration certificate	incl. works calibration certificate for +37°C
Door	inner glass door

<b>Stainless</b>	steel	interior
------------------	-------	----------

Interior	easy-to-clean interior,made of stainless steel, reinforced by deep drawn ribbing with integrated and protected large-area heating on four sides
Volume	108 I
Dimensions	w <sub>(A)</sub> x h <sub>(B)</sub> x d <sub>(C)</sub> : 560 x 480 x 400 mm
Max. number of internals	5
Max. loading of chamber	175 kg
Max. loading per internal	20 kg

### Textured stainless steel casing

Dimensions	w <sub>(D)</sub> x h <sub>(E)</sub> x d <sub>(F)</sub> : 745 x 864 x 584 mm (d +56mm door handle)
Housing	rear zinc-plated steel

#### **Electrical data**

Voltage Electrical load	230 V, 50/60 Hz approx. 1400 W	
Voltage Electrical load	115 V, 50/60 Hz approx. 900 W	

#### **Ambient conditions**

Set Up	The distance between the wall and the rear of the appliance must be at least 15 cm. The clearance from the ceiling must not be less than 20 cm and the side clearance from walls or nearby appliances must not be less than 5 cm.
Altitude of installation	max. 2,000 m above sea level
Ambient temperature	+5 °C to +40 °C
Humidity rh	max. 80 %, non-condensing
Overvoltage category	II
Pollution degree	2

# Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 830 x 1050 x 800 mm
Net weight	approx. 76 kg
Gross weight carton	approx. 101 kg

### Standard units are safety-approved and bear the test marks
