

Intelligent Evaporation

MADE IN
GERMANY

The average operational **lifespan of 10 years** is backed by a **3 year warranty** and makes your purchase a worthwhile investment.

Ground-free condenser:
Ventilation cap with PTFE inlay and threaded connection **prevents stuck glass**

Up to 40 % higher evaporation rate with a cooling surface of 2,200 cm² for all XL glass condensers

Highly resistant and durable PTFE vacuum seals **for many years of continuous operation**

Patented connection system with Easy-Clip to gently screw-off flasks and **vapor tube with clamping sleeve** prevent stuck glass parts

The right operating concept for all requirements: **with digital display or innovative touch display.** Also available as Control model with Control-Box for additional control of vacuum and Hei-CHILL recirculation chiller

The 210 °C safety heating bath with ergonomic handles and pour spout shuts down when running dry or at over temperature > 5 °C

For quick access, all models also have separate knobs with **LED rings showing the active functions**

Cable connections with protection class IP 67 protect against corrosion and short-circuits

For unlimited evaporation: In conjunction with the Distimatic automatic module, you can distill indefinitely and automatically in 24 / 7 operation. The affordable alternative to large rotary evaporators.

With standby function and residual heat warning at heating bath temperatures above 50 °C

Metal connection to the device console **prevents tilting of the bath**
