

Automatic Module

# Hei-VOLUME Distimatic

The clever way of  
continuous evaporation

With the unique residue drainage  
of the Distimatic automatic module,  
unlimited quantities can be automatically  
distilled in unattended, continuous operation.

**24 hours a day,  
7 days a week.**

- Automatic supply and removal of solvent mixture and condensate
- Almost one hundred percent solvent separation in automated unattended and continuous operation
- Individual determination of the concentration of the final product in order to prevent drying-out, crystallization and powder formation
- Automated supply of small volumes to avoid foaming
- Exchange of the storage and collecting vessels possible during the running process
- Permanent process monitoring via sensors, incl. full system shutdown in case of an emergency
- Compatible with all Heidolph rotary evaporators and large-scale rotary evaporators
